**TECHNICAL MANUAL
ILLUSTRATED PARTS BREAKDOWN**

**COMMUNICATION CONTROL GROUP
AN/GRA-96**

AF19(628)-524

F41608-69-D-0005

DISTRIBUTION STATEMENT - Distribution authorized to U.S. Government agencies and their contractors for Administrative and Operational Use (23 November 1992). Other requests for this document shall be referred to San Antonio ALC/TILT, 485 Quentin Roosevelt Rd, Kelly AFB TX 78241-6425.

WARNING - This document contains technical data whose export is restricted by the Arms Export Control Act (Title 22, U.S.C., Sec 2751, et seq.) or the Export Administrative Act of 1979, as amended, Title 50, U.S.C., app. 2401 et seq. Violators of these export laws are subject to severe criminal penalties.

HANDLING AND DESTRUCTION NOTICE - Handle in compliance with distribution statement and destroy by any method that will prevent disclosure of the contents or reconstruction of the document.

THIS PUBLICATION REPLACES T.O. 31R1-2GRA96-4, DATED 1 OCTOBER 1967.

PUBLISHED UNDER AUTHORITY OF THE SECRETARY OF THE AIR FORCE

Reproduction for nonmilitary use of the information or illustrations contained in this publication is not permitted without specific approval of the issuing service. The policy for use of Classified Publications is established for the Air Force in AFR 205-1.

Technical orders are normally distributed promptly after printing. Date(s) shown on the title page (lower right corner) are for identification only. These are not distribution dates. Processing time sometimes causes distribution to only appear to have been delayed.

LIST OF EFFECTIVE PAGES

INSERT LATEST CHANGED PAGES. DESTROY SUPERSEDED PAGES.

NOTE: The portion of the text affected by the changes is indicated by a vertical line in the outer margins of the page. Changes to illustrations are indicated by miniature pointing hands. Changes to wiring diagrams are indicated by shaded areas.

Dates of issue for original and changed pages are:

Original 0 1 Dec 69

TOTAL NUMBER OF PAGES IN THIS PUBLICATION IS 108 CONSISTING OF THE FOLLOWING:

Page No.	Change No.	Page No.	Change No.	Page No.	Change No.
Title	0				
A	0				
i	0				
ii Blank	0				
1-1 - 1-9	0				
1-10 Blank	0				
2-i - 2-8	0				
3-1 - 3-6	0				
4-1 - 4-79	0				
4-80 Blank	0				

Upon receipt of the second and subsequent changes to this technical order, librarians shall ascertain that all previous changes have been received and incorporated. Action should be taken promptly if the publication is incomplete.

*The asterisk indicates pages changed, added, or deleted by the current change.

**ADDITIONAL COPIES OF THIS PUBLICATION MAY BE OBTAINED BY USAF ACTIVITIES
IN ACCORDANCE WITH T.O. 00-5-2.**

SECTION I INTRODUCTION

1-1. GENERAL.

1-2. This illustrated parts breakdown (IPB) lists and illustrates the replaceable components, assemblies, and detail parts in the Communications Control Group AN/GRA-96, manufactured by ITT Federal Laboratories, Nutley, N.J. This illustrated parts breakdown is intended for use in requisitioning, storing, and identifying parts. Maintenance procedures for these items are covered in the following technical manuals:

- T.O. 31S6-2FLR9-2-1 & -2, Service, Printed-Circuit Card
- T.O. 31S6-2FLR9-2-4, Supplement, Service, Printed-Circuit Card
- T.O. 31S6-2FLR9-82 Power Supply PP-3931/FLR-9
- T.O. 31S6-2FLR9-182 Power Supply PP-3931A/FLR-9
- T.O. 31R2-2FRR68-2 Service Manual
- T.O. 31R2-2FRR68-3 Circuit Diagrams
- T.O. 31R2-2FRR68-4 I.P.B.
- T.O. 31R2-2FRR68-6WC1 P.M. Workcards
- T.O. 31R1-2GRA-102 Bearing Return and BRO Interface
- T.O. 31R1-2GRA96-2 Service, Communications Control Group AN/GRA-96
- T.O. 31R1-2GRA96-12 Amplifier-Detection

1-3. This manual is divided into four sections:

- Section I - Introduction
- Section II - Numerical Index
- Section III - Reference Designation Index
- Section IV - Group Assembly Parts List

1-4. NUMERICAL INDEX.

1-5. The Numerical Index, Section II, is an index of all part numbers in the Group Assembly Parts List, Section IV.

1-6. MFR PART NUMBER COLUMN.

1-7. This column contains each part number listed in the group assembly parts list, arranged in alphabetical and numerical order. A part which does not have a part number is likewise listed in alphanumeric order by its identifying name, with modifiers as required to identify the part, and the noun name treated

as a part number. Part number arrangement in this column is from left to right, one letter or number at a time, until the order of numerical listing is determined. The part numbers are arranged by the extreme left hand character in the following order of precedence:

- a. Letters A through Z
- b. Numerals 0 through 9

The second and succeeding characters from left to right determine the subsequent order of precedence of a part number, as follows:

- a. Space (blank column)
- b. Diagonal (Slant)
- c. Point (period)
- d. Dash (-)
- e. Letters A through Z
- f. Numerals 0 through 9 (alphabetical O's are considered zeros), except where an identifying noun is used as the part number.

1-8. FIG. AND INDEX NO. COLUMN.

1-9. The data in this column identifies and locates the parts in the Group Assembly Parts List, Section IV. The number preceding the dash is the figure number and the number following the dash is the index number. Where no index number is listed, the part number appears in the figure shown but is not indexed. Each occurrence of a part number in Section IV is indicated in this column; for government standard and contractor standard parts, the figure and index number of only the first occurrence in Section IV is listed.

1-10. SOURCE CODE DEFINITIONS.

1-11. CODE "P" - PARTS UNDER INVENTORY STOCK CONTROL.

a. Code "P" identifies parts which may be requisitioned and installed by any level of maintenance consistent with the Command's authorized scope of maintenance. Code "P" is applied to parts on which usage is anticipated or known. Restricted (emergency) service manufacture of code "P" items is considered practical but may be accomplished only after confirmation of non-availability from supply sources.

b. Code "P1" identifies parts which may be requisitioned and installed by any maintenance level consistent with the Command's authorized scope of maintenance. Code "P1" is applied to parts on

which usage is anticipated or known, and which service manufacture is considered impractical.

c. Code "P2" identifies insurance-type spare parts which can be installed by any AF activity consistent with the Command's authorized scope of maintenance. This code is applied to such parts which are basically structural items of very limited nature; require special tools, templates, and/or jigs and are very difficult, impractical, or uneconomical to manufacture by AF activities. These items are not subject to periodic replacement or wearout but may require infrequent replacement as a result of accidents or other unexpected occurrences. Delayed procurement items, as defined in AFLCM 400-1, are included under this code.

1-12. CODE "M" - MANUFACTURE, PARTS NOT PROCURED.

a. Code "M" identifies parts, the manufacture and installation of which is within the capabilities of field maintenance activities; and to which all of the following conditions apply:

- (1) Procurement is not justified because of low usage or peculiar storage and installation factors. Needs are to be met by local manufacture only as required.
- (2) Their manufacture does not require tools, equipment, or skills not normally authorized at field maintenance level.
- (3) Does not require test equipment not normally authorized at field maintenance level.
- (4) Does not require material not normally available in Air Force inventory.

b. Code "M1" identifies parts which can be manufactured at activities authorized depot-level maintenance facilities and to which all of the following conditions apply:

- (1) Procurement is not justified because of low usage or peculiar storage and installation factors. The need of base activities are to be met by requisitioning from the geographical AMA, LSM AMA, or AMA/AFD.
- (2) Their manufacture is beyond capabilities of field maintenance activities as outlined above.
- (3) Their manufacture does not require tools or equipment not normally authorized at all AMA's.

1-13. CODE "A" - ASSEMBLE, ASSEMBLY NOT PROCURED. Code "A" identifies items capable of being assembled at any level of maintenance and is applied to assemblies of two or more parts, the majority of which are purchased and/or service manufactured.

1-14. CODE "X" - PARTS CONSIDERED IMPRACTICAL FOR SERVICE MANUFACTURE OR PROCUREMENT AND FOR WHICH NO USAGE IS ANTICIPATED.

a. Code "X" is applied to main structural members or similar parts, which, if required, would

suggest extensive repair. The need for a part or parts coded "X" (wing spars, center section structure, etc.) should normally result in a recommendation to retire the article from service.

b. Code "X1" identifies parts application at any level of maintenance consistent with the Command's authorized scope of maintenance and for which it is more feasible to obtain the higher assembly; for example, an integral detail part such as a welded segment inseparable from its assembly; a part machined in a matched set; or a part of any assembly which, if required, would suggest extensive reconditioning of such assembly. In some cases, code "X1" may be used to indicate an integral detail part of an assembly which has no anticipated usage and as an assembly was source-coded "M" or "M1".

c. Code "X2" identifies parts applicable to any level of maintenance consistent with the Command's authorized scope of maintenance, for which there is no anticipated usage, and which are impractical for service manufacture. This type of item will not be stocked. Such parts shall be obtained from reclamation or, if not available from this source, requisitioned through normal supply channels together with supporting justification for one-time procurement and immediate use. Repeated requests shall justify a change to a code "P1" or "P2", as applicable, if considered economical to procure and store such parts.

1-15. CODE "U" - PARTS NOT PROCURED, MANUFACTURED, OR STOCKED. Code "U" is applied to installation drawings diagrams, instruction sheets, field service drawing numbers and parts not otherwise of supply significance, including obsolete parts, which cannot be procured or service manufactured.

1-16. MAINTENANCE REPAIR LEVEL CODE DEFINITIONS.

1-17. CODE "S" - NO REPAIR. Code "S" identifies items which are non repairable and have no reclamation value. When these items fail they will be disposed of at user level as condemned material.

1-18. CODE "B" - NO REPAIR; RECONDITION. Code "B" identifies assemblies or parts that will be reconditioned at the user level by adjusting, cleaning, soldering broken connections, etc. If these items cannot be returned to serviceable condition by such means they will be disposed of at user level as condemned material. No repair parts or tools are specially procured for maintenance of these items.

1-19. CODE "F" - FIELD LEVEL MAINTENANCE. Code "F" identifies items which will be repaired by the field level maintenance activities. Normal servicing will be done by organizational level maintenance. Selected parts, tools, and technical order data are procured and provided to applicable field level maintenance activities for repair of these items. No specialized repair activity (SRA) is established for these items. If they cannot be returned to serviceable condition by the field level

maintenance activity with the parts and tools provided they will be disposed of as condemned material. If repair of "F" coded items cannot be accomplished due to inavailability of authorized parts, tools, or other capability, the applicable SSM/IM will be so advised with request for disposition instructions. "F" coded critical items, regardless of condition, will be returned to supply for disposition instructions from the applicable SSM/IM.

1-20. CODE "D" - LIMITED FIELD REPAIR; DEPOT OVERHAUL. Code "D" identifies items which a limited degree of repair can be accomplished by field level maintenance activities. Normal servicing will be done at organization level. SRA is established for overhaul of these items. A range of repair parts, tools, and technical order data consistent with the capability or repair are procured and provided to applicable field maintenance activities. Because of the design characteristics and complexity of repair, the degree of repair which is authorized on these items at field maintenance level is necessarily determined by the degree of technical skills required and the cost of special tools, special test equipment, spare parts, and the predicted frequency of failure generation. If these items cannot be returned to serviceable condition with authorized parts and tools they will be returned to supply for shipment to the designated SRA.

1-21. CODE "DM" - LIMITED FIELD REPAIR; MOBILE DEPOT OVERHAUL. Code "DM" identifies items to which all conditions of code "D" apply except that repair beyond field capability will be done by the Mobile Depot Activity (MDA). If the MDA cannot repair these items, they will determine whether these items should be condemned or sent to SRA.

1-22. CODE "L" - DEPOT LEVEL MAINTENANCE. Code "L" identifies items that will be repaired only at designated SRA. Repair parts and tools for repair are procured and provided only to these authorized activities. Required functional checkout and bench check equipment may be provided to applicable organizational and field level maintenance activities for accomplishing external adjustment or calibration and for verifying serviceability of these items. If they are found unserviceable they will be turned in to supply for shipment to the SRA.

1-23. CODE "LM" - DEPOT LEVEL MAINTENANCE ONLY; MOBILE DEPOT ACTIVITY. Code "LM" identifies items to which all conditions of Code "L" apply except that repair will be accomplished by MDA. If MDA cannot repair these items, disposition instructions will be requested from the IM.

1-24. EXPENDABILITY - RECOVERABILITY - REPAIRABILITY - COST CODE DEFINITIONS.

1-25. The definitions of expendability-recoverability-repairability-cost (ERRC) codes are given in table 1-1.

1-26. REFERENCE DESIGNATION INDEX.

1-27. The Reference Designation Index, Section III, provides all the reference designations assigned to parts and assemblies in the equipment.

1-28. REFERENCE DESIGNATION COLUMN. This column lists the electrical designations in alpha-numeric order.

1-29. FIG. AND INDEX NO. COLUMN. The data in this column identifies and locates the parts in the Group Assembly Parts List, Section IV. The number preceding the dash is the figure number and the number following the dash is the index number.

1-30. MFR PART NUMBER COLUMN. This column lists the appropriate part number that appears in the group assembly parts list.

1-31. GROUP ASSEMBLY PARTS LIST.

1-32. The Group Assembly Parts List, Section IV, provides illustrations of the equipment with accompanying parts lists. Index numbers on the parts lists correspond to those on the illustrations. A part can be identified if its part number, description, or physical configuration is known.

1-33. FIG. AND INDEX NO. COLUMN. This column lists the assigned figure and index number of each part or assembly in the list and its associated illustration.

1-34. MFR PART NUMBER COLUMN. This column lists the contractor's part numbers, except that a government standard or vendor's part number is listed when applicable. (Refer to paragraph 1-42 for explanation of contractor's part numbers.) If the item has not been assigned a part number, the words "NO NUMBER" appear in this column. If the item has not been assigned a part number but is procurable through normal commercial sources, the word "COML" appears in this column. An asterisk (*) following the part number indicates that the item is a matched part. The symbol (#) following the part number indicates that the item is an alternate for the listed part which immediately precedes it.

1-35. DESCRIPTION COLUMN. This column provides the name and identifying description for the listed assemblies or parts. The phrase "/Per 07397 DWG SPEC/" following the nomenclature of a part indicates Sylvania Electronic Products Inc drawing number which identifies the part. The indentation arrangement of this column under the number "1" through "9" is used to show the relationship of a part or assembly to another part or assembly. Attaching parts are listed immediately following the assembly or part they attach. Attaching parts

Table 1-1. Expendability-Recoverability-Repairability-Cost (ERRC) Codes

ERRC Designator	ERRC Code	Expendable*	Repairable	Condemnation Level**	Category (Management)
XD1	C	Yes	Yes	Depot	Hi-Valu
XD2	T	Yes	Yes	Depot	XD items not selected for Hi-Valu
XF2	X	Yes	Yes	Field	Unit price \$100 or more
XF3	P	Yes	Yes	Field	Unit price less than \$100
XB2	V	Yes	No	User	See para 4c, Part II
XB3	N	Yes	No	User	Nonrecoverable (field or depot)
ND2	S	No	Yes	Depot	AF equipment management system
NF2	U	No	Yes	Field	AF equipment management system

are preceded by the words "ATTACHING PARTS". The symbol (---*---) is used to denote the end of the attaching parts and the continuation of the listing. The notation L indicates reference to the following:

T.O. 31S6-2FLR9-2-1
T.O. 31S6-2FLR9-2-2
T.O. 31S6-2FLR9-2-4

1-36. MFR CODE COLUMN. This column lists the manufacturer's code number as assigned in Cataloging Handbook H4-1, Federal Supply Code for Manufacturers (Refer to paragraph 1-39 for a listing of vendor's names and addresses.) This column is blank when the listed part is a government standard part, a standard commercial part, or part manufactured by Sylvania Electronic Systems.

1-37. UNITS PER ASSY COLUMN. This column lists the quantity of the listed part or assembly used at the given location. The abbreviation "REF" in this column indicates that the assembly or subassembly has been listed previously in the Group Assembly Parts List.

1-38. USABLE ON-CODE COLUMN. This column indicates the usability of parts with specific assemblies or subassemblies; such assemblies are always first-line listings. Where the USABLE

ON-CODE column is blank, the part is applicable to all articles covered by this breakdown.

1-39. MANUFACTURERS' CODES. The manufacturers' codes used in this manual are listed below:

CODE	MANUFACTURER'S NAME AND ADDRESS
00629	EBY Sales Co. of New York 148-05 Archer Ave. Jamaica, N.Y. 11458

1-40. EXPLANATION OF NONSTANDARD SYMBOLS AND ABBREVIATIONS.

1-41. The nonstandard symbols and abbreviations used in this Illustrated Parts Breakdown are listed below.

Symbol or Abbreviation	Explanation
☒	Alternate part
*	Matched set
---*---	End of attaching parts
GAPL	Group Assembly Parts List
MDA	Mobile Depot Activity
SRA	Specialized Repair Activity

1-42. CONTRACTOR'S PART NUMBERS.

1-43. In general, contractor's parts are identified by a simple numerical system in which each part is assigned a drawing number.

a. A two-digit numerical prefix identifies the type of product covered by the Sylvania drawing number, as follows:

Prefix	Explanation
00 thru 09	Sylvania manufactured equipment, packaging and packing supplies.
11 thru 59	Electronic Products
70 thru 79	Mechanical products and devices
80 thru 89	General parts and products.
90 thru 99	Raw modification.

b. The drawing number proper (after the two-digit prefix) identifies the plant location within Sylvania Electronic Systems, which is responsible for a particular drawing as follows:

Drawing Number	Location
100 thru 29999	Sylvania Electronic Systems - Central, Buffalo, New York
30000 thru 39999	Sylvania Electronic Systems - East, Waltham, Mass.
90000 thru 90999	Sylvania Electronic Systems - Central, Buffalo, New York
100000 thru 149999	Sylvania Electronic Systems - Central, Buffalo, New York

<u>Drawing Number</u>	<u>Location</u>
180000 thru 190999	Sylvania Electronic Systems - East, Waltham, Mass.
198900 thru 200000	Sylvania Electronic Systems - East Waltham, Mass.
300000 thru 314999	Sylvania Electronic Systems - East, Waltham, Mass.
317000 thru 350999	Sylvania Electronic Systems - East Waltham, Mass.
354000 thru 399999	Sylvania Electronic Systems - West, Mountain View, Calif.
450000 thru 499999	Sylvania Electronic Systems - East Waltham, Mass.
700000 thru 849999	Sylvania Electronic Systems, - West, Mountain View, Calif.
900000 thru 999999	Sylvania Electronic Products - Central Buffalo, New York

1-44. HOW TO USE THE ILLUSTRATED PARTS BREAKDOWN.

1-45 WHEN THE PART NUMBER IS KNOWN

a. When the part number is known, refer to Section II, Numerical Index. Locate the part number and

note the figure and index number assigned to the part number.

b. Turn to the figure number indicated and locate the index number referenced in the Numerical Index.

c. If a pictorial representation of the part, or its location is desired, refer to the same index number on the accompanying illustration.

d. When the reference designation is known, refer to Section III, Reference Designation Index. Locate the reference designation and note the figure and index number and the part number assigned.

e. Turn to the figure indicated and locate the index number referenced in the Reference Designation Index.

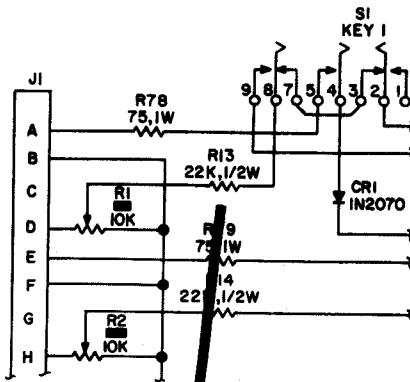

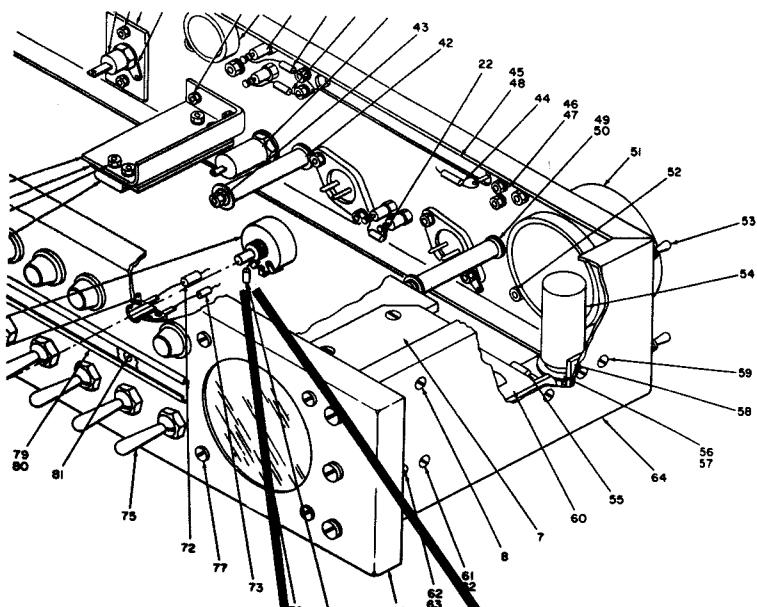

f. If a pictorial representation of the part, or its location is desired, refer to the same index number on the accompanying illustration.

1-46. WHEN THE PART NUMBER IS NOT KNOWN

a. Determine the function and application of the part required. Turn to the Alphabetical Index and select the title of the assembly in which the part or unit belongs. Note the illustration page number.

b. Turn to the page indicated and locate the desired part on the illustration.

c. From the illustration, obtain the index number assigned to the part desired. Refer to the accompanying description for specific information regarding the part.
